

1. Start white side up. (The other side will show on the finished piece.)
2. Fold A to B along DE (initially a valley fold). Unfold.
3. Fold D to E along AB (initially a valley fold).
4. Fold F to C along AD and G to C along BD (initially mountain folds relative to the white side).
5. Flip, repeat step 4 for other two corners, flip.
6. Fold along FH, FH, GJ and GK. Crease both mountain and valley folds. Unfold completely.
7. Fold D and E toward C along HJ and LM.
8. Fold and unfold along NO and then PQ. Unfold completely.
9. Repeat steps 7 and 8 for other two sides.
10. Now crease NR, PS, HT, JT, RU, and SV.
11. Repeat step 10 for other three sides.
12. Zig-zag fold HJ and RS, holding T against W without extending the RS crease much.
13. While holding the folds from step 12, zig-zag fold, along CH and CN, so that CH lies along CD. At the same time your doing that, make sure that FH folds so that point U moves down and left toward I. HT and NR should also be folding at this time. If all went well, D and H should be touching.
14. Do that seven more times with the other side/corner combinations. If you keep the four colored triangles, like CHI, flat and have 90 degree (or so) folds along CD, etc. between those triangles, you should have basically a pyramid shape with an extra triangle (such as FHI) attached to the bottom of each triangular pyramid side.
15. Curl each extra triangle inside the pyramid.

— Mountain Crease  
- - - Valley Crease
